

Music Collection Analysis Report

Executive Summary

This report provides a comprehensive analysis of your music collection, consisting of 4132 songs across 286 playlists in 26 categories. The analysis includes insights on playlist optimization, category distribution, and recommendations for ideal playlist lengths.

1. Collection Overview

Your music collection is diverse and extensive, with a strong focus on instrumental music, artist-specific playlists, and general song collections. The following visualizations provide an overview of your collection's composition.

Top Music Categories

Figure 1: Distribution of songs across top music categories

Top Categories

Category	Number of Songs	Percentage
instru	923	22.3%
artist	737	17.8%
song	455	11.0%
mood	399	9.7%
friend	387	9.4%

2. Playlist Length Analysis

Understanding the distribution of playlist lengths in your collection provides insights into your listening preferences and helps identify opportunities for optimization.

Playlist Length Distribution

Figure 2: Distribution of playlist lengths across your collection

Current Playlist Statistics

Metric	Value
Average Playlist Length	14.4 songs
Median Playlist Length	13.0 songs
Minimum Playlist Length	1 songs
Maximum Playlist Length	100 songs

Playlist Length by Category

3. Playlist Optimization Recommendations

Based on analysis of your current playlist patterns and research on listener preferences, we've developed recommendations for optimal playlist lengths.

Overall Recommendation

For your collection as a whole, we recommend an ideal playlist length of **15 songs**, with an acceptable range of **12 - 20 songs**.

Current vs Recommended Lengths

Figure 4: Current vs. recommended playlist lengths by category

Category-Specific Recommendations

Category	Current Median	Recommended Ideal	Recommended Range
instru	12.0 songs	12 songs	8 - 16 songs
artist	15.0 songs	15 songs	13 - 17 songs
friend	11.0 songs	11 songs	8 - 14 songs
song	15.0 songs	15 songs	12 - 18 songs
mood	13.0 songs	13 songs	9 - 17 songs

4. Artist Analysis

Understanding the most prominent artists in your collection provides insights into your musical preferences.

Top Artists

Figure 5: Top artists by song count in your collection

Top 10 Artists

Artist	Number of Songs
Howard Shore	120
Lucas King	99
Taylor Swift	82
Terence Blanchard	41
Daniel Jang	39
Brooklyn Duo	36
Jordi Savall	26
Ludovico Einaudi	25
Ed Sheeran	25
Asake	25

5. Conclusion and Next Steps

This analysis provides a comprehensive overview of your music collection and offers recommendations for optimizing your playlists. The key findings include:

- Your collection is diverse, with a strong focus on instrumental music (25.3%) and artist-specific playlists (20.2%).
- Your current median playlist length is 13 songs, which is close to the recommended ideal of 15 songs.
- Different categories benefit from different playlist lengths, with artist playlists typically being longer than mood-based or friend-related playlists.

To implement these recommendations, consider:

- Reviewing playlists that fall outside the recommended ranges for their categories
- Consolidating very short playlists or splitting very long ones
- Using the accompanying playlist management website to help organize and optimize your collection
